Seeking a challenging and responsible Developer position where i can learn and share knowledge for the growth of organization as well as an individual.

EXPERIENCE SUMMARY

- Having **1.2+** Year Freelance & ARC Tutorial experience as Web Development.
- Having **4.7+** Years of Qlik Sense development experience in mashup, extensions, and widgets.
- Having Qlik Sense development experience in frontend & backend.
- Core involvement from requirement gathering till developing plugins.
- Qlik Engine API.
- Designing, developing, maintaining, and supporting multiple Qlik Sense dashboards.
- Qlik Sense developing.
- Qlik Geo Analytics.
- Qlik Integration with qsock & enigma.js.
- Bot Deployment for client with Qlik Sense based on specific KPI's.
- Familiar with Power BI.
- NPrinting Report and Task development.

ORGANIZATIONAL EXPERIENCE

- Currently working as Qlik Sense Developer for **Medly Pharmacy from Oct 2020 to Present**.
- Qlik Sense Consultant & Developer for Mahindra & Mahindra (Mumbai) through Clay Logix Pvt Ltd from Nov 2016 to Oct 2020.
- Qlik GeoAnalytics Support to Accenture.
- Burger King, Oberoi Hotel Support in Extensions.
- POC done on Power Bi project.
- POC on other projects related to client-side requirements.

TECHNICAL SKILLS

Business Intelligence Tool	Qlik Sense & API
Database	MYSQL Workbench, SQL
Programming Language	PHP, JavaScript, Core Java
Operating Systems	Windows Family

ACADEMIC RECORD

Degree	Board/University	Institute	Year
B.Sc. in Computer Science	Mumbai University	MVLU College, Mumbai	2015
Senior Secondary	HSC	Bagarka College, Mumbai	2010-11
Secondary	SSC	St John's The Evangelist High School, Mumbai	2008-09

For Medly Pharmacy as Qlik Sense Developer

- Qlik Sense Application development.
- **5+** NPrinting maintaining and developing reports, filters, users, and group for Sales, Operations, Revenue dashboard etc.

Qlik Development

- **Machine shop DOL, HR Expense & HR MIS Report Dashboard:** Frontend, Backend & UI
- **Bot** with Supply Chain, HR: Bot level integration making master measures & architecture of bot with respect to requirement.
- **NPrinting:** Integration for multiple application

Training

- Provided Online & Offline Training course for basic **Extension, Widget** and **Mashup** development in **Qlik API** to teams across organization & client.

PROFESSIONAL EXPERIENCE

Core Responsibilities

- Developed plugins/extensions to provide custom functionality in Qlik Sense application
- Maintaining & upgrades for my plugin
- Mashup to enhance user experiences.
- Training
- Implementing Section Access to restrict the data from unauthorized users.
- Qlik Sense Application Development including UI.

Project 1

- Making Section Access File for application
- New extension development
- Old extension enhancement and maintenance
- **40+ extension** developed for projects.
- Qlik Sense Application Development with Design UI
- New extension & Mashup development for different application
- **Qlik Mashup:**
 1. **Sales, Service, Finance, MTBD Dashboard**
 2. **App information:** Gets all information about application i.e., Number of objects in sheet with object id's and sheet id's, Master Dimension, Measure & Visualization list with meta data, Variable list and meta data, Object List sheet wise with Dimension and Measure used and search capability in all these options.
 3. **Mashup for Bot:** Multiple Dashboards

Project 2 Bot with Qlik Sense

- Custom bookmark
- Profiling
- Python Integration
- Qlik Sense Connectivity using enigma.js
- On-Fly charts generation using Qlik Sense
- Comments on Chart
- Suggestion
- Basic Alerts generation
- Works with master measure
- Default selection, Images, Chat Theme, Custom menu based fixed visualization from dashboard etc.
- Bot Extension inside Application itself will all the above functions (similar to Qlik insight Bot)

Project 3 HR MIS Report

MSI Report which showcases number of employee active, resigned, terminated, transferred in/out of organization.

- User friendly UI with custom extension doing all the major activity such as navigation to sheet when clicked on a cell.
- Passing proper selections to sheet while navigation between sheets.
- Responsible to make ETL for this dashboard.
- Data from SAP BW queries.

Project 4 Machine Shop DOL

Report which showcases number of parameters which is used identify quality of part.

- Reports are triggered via NPrinting to business users & upper management personnel.
- Responsible to make ETL for this dashboard.
- Data from SAP BW queries.

Major Plugins Developed

- **Sheet Level Access** for disabling sheet based on section access file in the application.
- **Variable Button:** This has the capability to change or assign value to multiple variables at the same time as toggle switch
- **Popup Chart:** It has dynamic button created which loads different master charts based on configuration provided in extension.
- **Trigger:** This plugin works as Qlik View trigger (object click action is not present)
- **3 types of Legends:** Dynamic legends (circle/rectangle shape) a field can be specified, and selection can be done if that legend is clicked.
- **Side Filter:** A side filter pane which accepts 10 master objects (Filter pane only) as parameter and all filters are hidden until open button is clicked.
- **Different types of KPI object:** All KPI objects accepts measures from 1 to 3 with responsive UI.
- **Sheet Navigation:** A navigation object with Qlik API capabilities
- **Export Button:** Exports data from chart object if export option is supported.
- **Triangle Chart:** CSS Based Triangle chart with dynamic value on right and left side with predefined or custom colors.
- **Qlik Sense Styler:** Styler for Qlik sense as plugin which styles all objects excepts TEXTBOX and KPI.
- **Custom Filter Pane** with advance features of default selection and two style type List & Button
And Many More.

Manufacturer App

Report which showcases number of parameters which is used identify Drug Manufacture.

- Reports is for business users & upper management personnel.
- Data comes from Google spreadsheets & QVD's.
- Reload button extension is developed to enable users to update Drug ID & refresh the application.

General Compliance

Report which showcases number of parameters which is used identify Drug given to Patients from Provider.

- Reports is for business users & upper management personnel as per sensitive data.
- Data comes from Google spreadsheets & QVD's.
- These reports provide pinpoint reports & can filter & export the data for further reporting.

Medly NPrinting Reports

- Responsible for all NPrinting reports for more than 10 Applications.
- Reports distributed to 80+ users.
- User list auto updated using Import & Export task.
